InCreditble

WINK / The selected identity

A tilted rounded square. A crescent eye. A confident smile. An approachable identity for people who want their savings to connect to everyday life.

Your portfolio. Your payday.

Write InCreditble; say it like incredible. Descriptor: Bond investing. Everyday cash flow. Supporting line: Give your savings a schedule.

Approved direction 02. Use the supplied masters. Historical concepts are not current brand assets.

InCreditble

Make it feel like InCreditble.

Logo

Use Ink on light surfaces and white on Ink or Violet. Allow clear space equal to 25% of the symbol width. Prefer 32 px or larger; use the small variant for 16-24 px favicons. Horizontal minimum: 160 px. Do not stretch, mirror, redraw or add rotation.

Color

Ink #241634. Violet #7445FF. Lime #D9FF66. Paper #FFFDF5. Apricot #FFAA7A. Default to Ink on Paper or Lime, and Paper on Ink. Do not communicate risk with color alone.

Type and layout

Outlined Avenir Next Bold wordmark. Templates use Avenir Next with Arial/sans-serif fallbacks. Font software is not included; confirm deployment licensing. Short headlines, generous margins, rounded panels, one idea per graphic.

Voice

Warm, clear and a little playful. Say estimated cash flow, explore the prototype, and understand the trade-offs. Never promise guaranteed passive income or imply that higher risk guarantees a higher return.

Meaning

Payday means a proposed transfer. Transfers can include interest, existing cash or principal. A weekly display does not mean weekly bond coupons. The 2%-10% demo range is synthetic and is not expected total return.

Handoff

SVG masters, transparent PNGs, web icons, seven social layouts, four stationery concepts, landing and email templates, marketing copy and this guide. RGB concept artwork is not printer-ready CMYK production. Email templates require approved sender details and hosted assets before sending.

Discovery-stage identity; no trademark clearance is claimed. No live investing, card or payment service. Pair short marketing assets with their full explanatory captions.
