InCreditble

Your portfolio. Your payday.

Bond investing. Everyday cash flow.

Give your savings a schedule.

Explore Treasury and corporate bond portfolios around the life you want to fund. Start with an amount, choose your comfort with risk, and see an estimated after-tax interest equivalent.

01

Choose an amount.

Try an investment amount and see the capital allocated to bonds and a cash reserve.

02

Find your rhythm.

Compare weekly, biweekly, monthly or quarterly interest equivalents. Actual transfers need a funded payment schedule.

03

Know the trade-offs.

Review the bonds, taxes and risks. Higher coupons can come with greater risk of loss. Principal returned is not income.

Explore the prototype. Help shape InCreditble. Founded by Ivy Pei, with a background in corporate bond portfolio management.

Concept only. Synthetic examples, not live quotes or forecasts. No live investment, account, card or payment service. Investing involves risk; returns and payouts are not guaranteed.
